

MUHAMAD ILHAM FADILLAH SUHERLAN

MOBILE DEVELOPER | SOFTWARE ENGINEERING FRESH GRADUATE

Cimahi, Indonesia | +6281214145706 | muh.ilham.fs@gmail.com | www.linkedin.com/in/muhamadilhamfs | <https://github.com/ilhamfs7> | <https://portfolio-psi-kohl.vercel.app/>

SUMMARY

Software Engineering fresh graduate with hands-on internship and academic project experience developing mobile applications using Flutter/Dart and Kotlin/Jetpack Compose. Experienced in stakeholder interviews, requirements analysis, UI and database design, feature implementation, and software testing. Developed mobile features for Kado Ceria and GROW, including an interactive flipbook and daily intake monitoring.

EDUCATION

Diploma (D3) in Software Engineering | Politeknik Negeri Bandung - Kabupaten Bandung Barat, Indonesia | Aug 2023 - Aug 2026 | GPA 3.58/4.00

TECHNICAL SKILLS

Mobile Development: Flutter, Dart, Kotlin, Jetpack Compose, Android Studio, MVVM, API Integration, Local Storage, UI Design

System & Database: Requirements Gathering, Stakeholder Interview, Existing System Analysis, System Modeling, SQL, PostgreSQL, ERD

Testing: Test Case Development, Black-box Testing, Integration Testing, Validation Testing

Tools & Version Control: Figma, Git, GitHub, Postman

WORK EXPERIENCE

Balai Bahasa Provinsi Jawa Barat | Bandung, Jawa Barat

Intern as Mobile Developer | Flutter, Dart, MVVM | Jul 2025 – Oct 2025

- Implemented the main flipbook feature of the Kado Ceria app, a bilingual (Sundanese–Indonesian) interactive audio storybook for early childhood, BIPA learners, and persons with disabilities, using `page_flip` for page-turn effects and audioplayers for audio playback.
- Conducted stakeholder interviews and existing-system analysis; translated 2 use cases and 3 sub-use cases into 9 functional and 4 non-functional requirements.
- Followed MVVM architecture and designed the ERD and UI.

PROJECT EXPERIENCE

MOBILE APPLICATION – GROW | <https://github.com/grow-app-4/grow-app-mobile>

*Mobile Developer | System Analyst | Kotlin, Jetpack Compose, MVVM, PostgreSQL
Feb 2025 – Jun 2025*

- Implemented the daily intake monitoring feature (mother's intake and child's breast milk intake) using Kotlin, Jetpack Compose, and MVVM, with local storage and API integration.
- Designed the ERD and PostgreSQL database, implemented daily intake monitoring, and developed 10 test cases with a 100% pass rate.
- Identified stakeholders and translated 5 use cases and 1 sub-use case into 9 functional and 7 non-functional requirements.

CONTENT MANAGEMENT SYSTEM - KADO CERIA | <https://github.com/DAlIriJTK/cms-kadoceria>

*Project Lead | System Analyst & Technical Writer | Backend Developer | Quality Assurance
Jan 2026 – Aug 2026*

- Led the project team (task allocation and scheduling) and maintained and improved an existing Laravel/PHP content management system designed to let Balai Bahasa Provinsi Jawa Barat update Kado Ceria flipbook content without code changes or app redeployment.
- Fixed bugs in the narration, background, and object audio features.

ADDITIONAL TECHNICAL PROJECTS

Suku Face Recognition | <https://github.com/yanirahmawati234/suku-face-recognition>

*Backend Developer | Python
Feb 2025 – Jun 2025*

- Refactored preprocessing using MTCNN

Gamification - Semaphore | https://github.com/ilhamfs7/TUBES_PCD_PR_Gamifikasi_Semaphore

*Backend Developer | Python
Feb 2025 – Jun 2025*

- Modified detection logic and input vs target comparison

Hidingdata | <https://github.com/ilhamfs7/proyek2-kel2>

*Backend Developer | C
Feb 2024 – Jun 2024*

- Implemented LSB encryption/decryption with a doubly circular linked list

Search Application Using Trie Data Structure | <https://github.com/Yorubreak/Tugas-Besar-SDA>

*Backend Developer | C++
Feb 2024 – Jun 2024*

- Implemented Trie-based search

CERTIFICATION & TRAINING

Arutala Junior Backend Developer using Spring Boot – Distinguished | Arutalalab | July 2026

Test of English for International Communication (TOEIC) | Politeknik Negeri Bandung | Score: 765 | May 2026
